

eyetv hybrid

Digital TV on your Mac & PC

Watch, record, edit and enjoy digital television live on your Mac or PC with EyeTV Hybrid, a versatile hybrid TV tuner stick for DVB-C and DTT TV.

Despite its small size, EyeTV Hybrid contains a full-size and built-in coaxial plug and does not require an adapter to connect cable or an aerial.

EyeTV Hybrid comes with EyeTV 3, the award-winning TV software for Mac. Watch, pause, and rewind live TV on your Mac. Search the Program Guide, record TV shows, and export recordings to iTunes automatically for playback on an iPhone, iPad or Apple TV.

EyeTV Hybrid also includes THC software for Windows, which supports many of the same features as EyeTV 3.

What's in the Box

- EyeTV Hybrid
- Rod antenna with magnetic base and detachable suction cup
- USB cable
- Software download guide (EyeTV 3 and THC)

System Requirements

- Mac: OS X 10.9 or later
- PC: Windows 7 or later, 2 GHz Intel Core 2 Duo (or comparable)

Internet connection required to download EyeTV 3 / THC software.

Important Notes

- Freeview HD, encrypted programs and/or DVB-T2 broadcasts are not supported.
- The availability and amount of program information varies depending on the channel.

Digital terrestrial television is also known as DVB-T, DTT, Freeview in the UK, and TNT in France. DVB-T reception can vary by location, and a rooftop aerial may be required in areas with a weak or obstructed DVB-T signal.
